

# ABOUT ME

I'm a frontend developer with a background in design. I've worked on various projects, turning creative ideas into working websites. I enjoy every part of the process, from planning to coding. Let's create something awesome together!

HTML			

## PROJECTS

SaveCash is a user-friendly web platform designed to help individuals manage their finances efficiently. It includes features like live balance tracking, customizable savings targets, and an easy-to-use account creation system with authentication powered by Firebase. Users can securely monitor their saving history and track progress towards their financial goals, making SaveCash an essential tool for anyone looking to save money effectively.

JCBKdev is a website facilitating client communication and inquiry submission. Utilized HTML, CSS, and JavaScript to design a straightforward form submission process. Integrated with a third-party email API service, enabling seamless transmission of inquiries to designated email addresses. Ensures prompt notification and efficient inquiry handling, enhancing client interaction and communication.
